Hi Donna,

Thanks for the follow up on the meeting scheduling. I will stay in close contact with you in the next couple of weeks and as the project is being prepared for public review to ensure that the item is heard at a good time during the public review period.

As I mentioned previously, the MUP application for LanWest was withdrawn by the applicant. While they are not pursuing a MUP for the LanWest project at this time, both the LanWest and LanEast sites are being evaluated at a program level in the Soitec EIR. Should the applicant wish to pursue a MUP for the site at a later date, a new MUP application would be required and an analysis would need to be completed to determine whether the program level analysis completed in the EIR can be relied upon for the project.

Soitec does not have any other active projects in the unincorporated San Diego County. The Desert Green project was a modification of the approved Eurus project and resulted in a reduction of the development area and a change to the Soitec CPV technology. That modification (P09-012W1) was approved in March, 2013.

Thanks,

Ashley

Hi Ashley,

For clarification of Jim's message, at our Oct 3rd meeting, there was a general consensus that it would be best to have the County's Soitec DEIR /MUP presentation at a regular Planning Group meeting instead of holding a separate public meeting.

However, if our next first Thursday meeting date of Nov 7th is too soon, and our Dec 5th meeting is too late, then it would be best to hold a separate meeting for the DEIR and the Boulevard Planning Group would be willing to host that meeting.

Also, when I asked Jim why he had not disclosed the withdrawal of the LanWest MUP application, his response mentioned that the Power Purchase Agreement for Soitec's LanWest was needed for another project. When I asked if LanWest will be coming back, later, he said yes.

Do you know what he is talking about? Does Soitec have any other active projects in San

Diego County? Have they filed for their Desert Green project in Borrego that is noted in their Power Purchase Agreement with SDG&E?

Thanks

Donna Tisdale, Chair
Boulevard Planning Group

Hi Ashley --

A topic of discussion at last Thursday's Boulevard Planning Group meeting was whether to do the Soitec DEIR public meeting at the same time/place as the regularly scheduled Planning Group meeting. Tentatively, the Planning Group board anticipates the DEIR to be the focal point of the November 7 meeting. Are you amenable to doing the DEIR meeting at the Planning Group meeting? -- we are. Please let us know.

Thanks,

Jim
